## BUYING ADDITIONAL PENSION BENEFITS

1. Section 3.3 of the Consultation Document on reform of the Scottish Teachers' Superannuation Scheme (STSS) sets out proposals for replacing the existing provisions for buying added years with more flexible arrangements.
2. Under the proposed arrangements, members of the STSS would be able to buy Additional Pension Benefits (APB) in units of $£ 250$ of additional annual pension up to a maximum of $£ 5,000$ additional annual pension.
3. While there is no automatic lump sum associated with APB, at retirement you will be able to convert some of your APB to a lump sum. You would receive $£ 12$ of lump sum for every $£ 1$ of APB that you give up. So, if you had bought $£ 2,000$ of APB you could decide to convert $£ 500$ of it to a lump sum. If you did, you would receive an additional lump sum of $£ 6,000$ and an additional $£ 1,500$ a year on your pension.
4. The following tables give illustrative costs for buying $£ 1,000$ of APB (both for members whose normal pension age is 60 or 65). A modeller is currently being developed to enable you to enter a number of different scenarios. You can decide to buy APB for your pension only, or you could also provide for your dependant to receive one half of the APB you have bought after your death. Illustrative costs for personal benefits and for personal benefits combined with half rate dependants' benefits are included in the tables below.
5. The illustrative costs shown in the tables are for both a single payment and, alternatively, monthly contributions to buy $£ 1,000$ worth of APB. Where payment is spread over a number of years, the cost of buying added pension would be reviewed alongside each four-yearly scheme valuation and the payment required for future instalments would be adjusted in line with the outcome of that review.
6. The following illustrative costs are based on the purchase of $£ 1,000$ worth of APB. The cost of buying higher or lower amounts is directly proportionate, ie the cost of buying $£ 2,000$ of APB would be twice the amount shown in the tables; and the cost of buying £500 of APB would be one half of the amount shown in the tables.
7. NB these costs are illustrative. The actual initial cost of buying APB either by way of a lump sum or by regular additional contributions or instalments will be finalised before the new arrangements come into effect on 1 April 2007.
